DETAILED ACTION

1. In view of the Appeal Brief filed on 04/27/2005, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

4. Claims 1, 13 and 19 are directed to a method of time stamping a document. The examiner respectfully asserts that the claimed method does not fall within the statutory classes listed in 35 USC 101. The claimed method is an abstract idea. Claims 1, 13 and 19 are rejected as being non-functional descriptive material (i.e., abstract idea). Claims 2-12, 14-18 and 20-30 depend on claims 1, 13 and 19 and are rejected under the same rationale.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 13-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Levine US Patent 6,393,566 B1.

7. As per claim 13, Levine teaches a method for time stamping a document (see abstract) comprising:

creating a time stamp receipt including identifying data associated with said document and a time indication [column 6, lines 10-24];

transmitting said time stamp receipt to an outside agency [column 6, lines 25-32 and column 6, lines 65-column 7, line 1];

cryptographically binding (i.e., creating a hash function of the message time-stamp) at said outside agency said identifying data and said time indication [column 6, lines 30-52 and column 7, line 1-14].

8. As per claims 14-16, Levine further teaches the identifying data comprises a digital representation of at least a portion of said document (i.e., hash value) [column 5, lines 45-46 and column 7, lines 15-25].

Art Unit: 2135

9. As per claims 17-18, Levine further teaches the time stamp receipt further includes an identification number associated with the document originator [column 6, lines 12-22].

Allowable Subject Matter

10. Claim 1-12 and 19-30 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.
